Volume 30 Index: 1993

January/February pp. 1–84, March/April pp. 85–180, May pp. 181–284, June pp. 285–364
July/August pp. 365–480, September/October pp. 481–584, November pp. 585–672, December pp. 673–760

Activated carbon. A Non-Destructive Method for Estimating the Water Content of Filters Containing Activated Carbon, p. 147

Activated carbon. Vapour phase filtration using activated carbon, p. 707

Aerosols. Granular Filtration of Polydispersed Aerosols, p. 253

Backflushing. The Use of Electrostatic Interactions to Improve the Backflushing Effect in Crossflow Microfiltration, p. 331

Bag filters. Advanced filtration technology to satisfy tomorrow's legislation, p. 37

Bag filters. Optimising bag filter performance by monitoring emissions, p. 617

Basket centrifuges. Practical Guide to the Selection and Operation of Batch-Type Filtering Basket Centrifuges, p. 647

Cake filtration. Continuous Vacuum Filtration: Small Scale Tests versus Full Scale Performance, p. 735

Cake filtration. Dewatering of Cakes, p. 641

Cartridge filters. Absolute efficiency depth filter cartridge advances, p. 21

Cartridge filters. Coated fabric cartridge filter medium for dust filtration, p. 613

Cartridge filters. Cost savings in pharmaceutical and cosmetic prefiltration, p. 33

Cartridge filters. Filtration technologies in food and beverage processing, p. 513

Centrifuges. Advanced centrifuges for solid-liquid separation and liquid-liquid extraction, p. 105

Centrifuges. Practical Guide to the Selection and Operation of Batch-Type Filtering Basket Centrifuges, p. 647

Ceramic membranes. Energy-efficient ceramic crossflow microfiltration membranes, p. 113

Conference report. Congress on Applied Chemistry, p. 711

Conference report. Gold extraction, p. 531

Conference report. Mineral technology and Mineral processing & hydrometallurgy meetings, p. 123

Contamination control. Microbial Contamination Control in Antibiotic Manufacture, p. 543

Cosmetics. Cost savings in pharmaceutical and cosmetic prefiltration, p. 33

Crossflow microfiltration. Crossing the micron flow, p. 19

Crossflow microfiltration. Energy-efficient ceramic crossflow microfiltration membranes, p. 113

Crossflow microfiltration. The Use of Electrostatic Interactions to Improve the Backflushing Effect in Crossflow Microfiltration, p. 331

Crossflow microfiltration. Ultrafiltration using polyaramide membranes — A new dimension in environmental technology, p. 206

Depth filters. Absolute efficiency depth filter cartridge advances, p. 21

Dewatering. Dewatering of Cakes, p. 641

Dewatering. Dewatering of Peat Slurry Produced by Wet Milling Technique, p.327

Dewatering. The future of sludge dewatering, p. 211

Dewatering. The problem of sapropel dewatering, p. 627

Disc filters. Simulation of Disc Filter for the Pulp and Paper Industries, p. 554

Dust filtration. Advantages of P84 filter medium in waste incineration plant dedusting, p. 610

Dust filtration. A worldwide service from P&S Filtration, p. 366

Dust filtration. Coated fabric cartridge filter medium for dust filtration, p. 613

Dust filtration. Optimising bag filter performance by monitoring emissions, p.617

Dust filtration. Trevira microfilament yarns in environmental technology, p. 383

Electrostatic enhancement. Moving Granular Bed Filtration with Electrostatic Enhancement for High-Temperature Gas Clean-up, p. 550

Electrostatic enhancement. The Use of Electrostatic Interactions to Improve the Backflushing Effect in Crossflow Microfiltration, p. 331

Electrostatic precipitation. Gas Cleaning by Wet Electrostatic Precipitation — New Prospects, p. 637

Fabric filters. Analysis of the Motion of Mechanically Shaken Filter Bags, p. 151

Filter bag cages. Corrosion resistance for filter bag cages at elevated temperatures, p. 311

Filter bag cleaning. Analysis of the Motion of Mechanically Shaken Filter Bags, p.151

Filter bags. Analysis of the Motion of Mechanically Shaken Filter Bags, p. 151

Filter presses. Refitment of plate and frame filter presses, p. 119

Filter tubes. A world-leading manufacturer of filter tube machines — Meltog, p. 509

Filtration efficiency. Evaluation of Porous Filter Operation Efficiency, p. 55 (Correspondence, p. 654)

Filtration efficiency. Moving Granular Bed Filtration with Electrostatic Enhancement for High-Temperature Gas Clean-up, p. 550

Food and beverage. Filtration technologies in food and beverage processing, p. 513

Food and beverage. Monitoring of particulate emissions in food processing, p. 523

Gas cleaning. Gas Cleaning by Wet Electrostatic Precipitation — New Prospects, p. 637

Gas cleaning. Novel particulate control device for industrial gas cleaning, p. 29

Gas scrubbing. Dry scrubbing of process off-gases, p. 709

Gas scrubbing. The Scrubbing of Combustion Off-Gases to Remove Acids and Other Pollutants, p. 739

Granular filtration. Granular Filtration of Polydispersed Aerosols, p. 253

Hot gas filtration. Advantages of P84 filter medium in waste incineration plant dedusting, p. 610

Hot gas filtration. Dry scrubbing of process off-gases, p. 709

Hot gas filtration. Moving Granular Bed Filtration with Electrostatic Enhancement for High-Temperature Gas Clean-up, p. 550

Hot gas filtration. PTFE yarns and felts with PTFE scrims — The influence of heat on physical properties, p. 371

Hot gas filtration. The Scrubbing of Combustion Off-Gases to Remove Acids and Other Pollutants, p. 739

Hydrocyclones. Concentration of Oil-in-Water Emulsion Using the Air-Sparged Hydrocyclone, p. 141

Industrial degreasing. Crossing the micron flow, p. 19

Industrial effluent. The Application of Nanofiltration Membranes to the Treatment of Industrial Effluent and Process Streams, p. 63

Industrial effluent. Wastewater treatment of coke ovens by-product effluent, p. 219

Inlet diffusers. Advanced filtration technology to satisfy tomorrow's legislation, p. 37

Integrity testing. A new in-place integrity test for hydrophobic membrane filters, p. 305

Lenticular cartridges. Filtration technologies in food and beverage processing, p. 513

Liquid/liquid extraction. Advanced centrifuges for solid-liquid separation and liquid-liquid extraction, p. 105

Mechanically shaken filter bags. Analysis of the Motion of Mechanically Shaken Filter Bags, p. 151

Media. Advantages of P84 filter medium in waste incineration plant dedusting, p.610

Media. A worldwide service from P&S Filtration, p. 366

Media. Coated fabric cartridge filter medium for dust filtration, p. 613

Membranes. A new in-place integrity test for hydrophobic membrane filters, p. 305

Membranes. Crossing the micron flow, p. 19

Membranes. Energy-efficient ceramic crossflow microfiltration membranes, p. 113

Membranes. Membrane motivation with pervaporation, p. 620

Membranes. Nanofiltration pilot plant studies, p. 623

Membranes. Organic Stabilisation and Nitrogen Removal in a Membrane Separation Bioreactor for Domestic Wastewater Treatment, p. 247

Membranes. Potential for filtration and membrane technology for space industrialisation, p. 315

Membranes. The Application of Nanofiltration Membranes to the Treatment of Industrial Effluent and Process Streams, p. 63

Membranes. The Use of Electrostatic Interactions to Improve the Backflushing Effect in Crossflow Microfiltration, p. 331

Membranes. Ultrafiltration using polyaramide membranes — A new dimension in environmental technology, p. 206

Microfilament yarns. Trevira microfilament yarns in environmental technology, p. 383

Mineral extraction. Mineral technology and Mineral processing & hydrometallurgy meetings, p. 123

Mineral processing. Copper residue washed and dried by pressure filtration, p. 313

Mineral processing. Gold extraction, p. 531

Nanofiltration. Nanofiltration pilot plant studies, p. 623

Nanofiltration. The Application of Nanofiltration Membranes to the Treatment of Industrial Effluent and Process Streams, p. 63

Oil/water emulsions. Concentration of Oil-in-Water Emulsion Using the Air-Sparged Hydrocyclone, p. 141

Operating line analysis. Operating Line Analysis of Pump and Filtration Systems, p. 241

Particle monitoring. Monitoring of particulate emissions in food processing, p. 523

Particle monitoring. Optimising bag filter performance by monitoring emissions, p. 617

Particle sizing. Particle sizing — Past and present, p. 379

Particulate control. Novel particulate control device for industrial gas cleaning, p. 29

Peat slurry. Dewatering of Peat Slurry Produced by Wet Milling Technique, p.327

Pervaporation. Membrane motivation with pervaporation, p. 620

Pharmaceuticals. A new in-place integrity test for hydrophobic membrane filters, p. 305

Pharmaceuticals. Cost savings in pharmaceutical and cosmetic prefiltration, p. 33

Pharmaceuticals. Microbial Contamination Control in Antibiotic Manufacture, p. 543

Polyaramide membranes. Ultrafiltration using polyaramide membranes — A new dimension in environmental technology, p. 206

Porous filters. Evaluation of Porous Filter Operation Efficiency, p. 55 (Correspondence, p. 654)

Power generation. Moving Granular Bed Filtration with Electrostatic Enhancement for High-Temperature Gas Clean-up, p. 550

Power generation. The Use of Computer Simulation of Tubular Reverse Osmosis in Conjunction with Pilot-Plant Studies, p. 59

Prefiltration. Cost savings in pharmaceutical and cosmetic prefiltration, p. 33

Pressure filtration. Copper residue washed and dried by pressure filtration, p. 313

PTFE. PTFE yarns and felts with PTFE scrims — The influence of heat on physical properties, p. 371

Pulp and paper. Simulation of Disc Filter for the Pulp and Paper Industries, p. 554

Reverse osmosis. The Use of Computer Simulation of Tubular Reverse Osmosis in Conjunction with Pilot-Plant Studies, p. 59

Selection. Practical Guide to the Selection and Operation of Batch-Type Filtering Basket Centrifuges, p. 647

Simulation. Simulation of Disc Filter for the Pulp and Paper Industries, p. 554

Simulation. The Use of Computer Simulation of Tubular Reverse Osmosis in Conjunction with Pilot-Plant Studies, p. 59

Sizing pumps. Operating Line Analysis of Pump and Filtration Systems, p. 241

Sludge dewatering. The future of sludge dewatering, p. 211

Software. Software helps water separator design at Domnick Hunter, p. 117

Solid/liquid separation. Advanced centrifuges for solid-liquid separation and liquid-liquid extraction, p. 105

Solid/liquid separation. A worldwide service from P&S Filtration, p. 366

Solid/liquid separation. Eimco/Wemco has solutions to waste handling problems, p. 14

Solid/liquid separation. Innovative single-plate filter, p. 109

Solid/liquid separation. Project development: Solid-liquid separation technology, p. 215

Space applications. Potential for filtration and membrane technology for space industrialisation, p. 315

TOC analysis. Photocatalysis of TOC measurements, p. 533

Ultrafiltration. Ultrafiltration using polyaramide membranes — A new dimension in environmental technology, p. 206

Vacuum filtration. Continuous Vacuum Filtration: Small Scale Tests versus Full Scale Performance, p. 735

Vapour filters. A Non-Destructive Method for Estimating the Water Content of Filters Containing Activated Carbon, p. 147

Vapour filtration. Vapour phase filtration using activated carbon, p. 707

Waste incineration. Advantages of P84 filter medium in waste incineration plant dedusting, p. 610

Wastewater treatment. Organic Stabilisation and Nitrogen Removal in a Membrane Separation Bioreactor for Domestic Wastewater Treatment, p. 247

Wastewater treatment. Wastewater treatment of coke ovens by-product effluent, p. 219

Water separators. Software helps water separator design at Domnick Hunter, p. 117

Water treatment. Nanofiltration pilot plant studies, p. 623

Yarns. PTFE yarns and felts with PTFE scrims — The influence of heat on physical properties, p. 371

Yarns. Trevira microfilament yarns in environmental technology, p. 383
